DESCRIPCIÓN DEL CURSO:		
<p>This course has three parts. It begins with a survey of the growing body of academic work that focuses on fieldwork in the current era of globalization, written by specialists from a wide spectrum of fields, including: linguistics, philosophy, anthropology, and postcolonial studies. During this component, students will also survey the scholarly work already done on the language and literature of their target group. The second part takes students to the field in the Anglophone Afro-Caribbean to collect data from native speakers, and introduces them to the techniques and skills necessary to prepare and carry out a fieldwork experience. The third part of the course deals with the linguistic and cultural analysis of the data collected.</p> <p>Este curso consiste en tres partes. Empieza con panorama del cuerpo creciente de obras académicas que se enfocan en el trabajo de campo en la época actual de globalización, escritas por especialistas de una gama extensa de disciplinas, incluyendo la lingüística, la filosofía, la antropología, y los estudios poscoloniales. Durante este componente del curso, el estudiante hará un inventario del trabajo académico ya realizado sobre la lengua y la cultura del grupo objeto de la investigación suya. La segunda parte del curso llevará al estudiante al campo en el afro-caribe anglofono para recopilar datos, introduciéndole a las técnicas y destrezas necesarias para preparar y llevar al cabo una experiencia de trabajo de campo. La tercera parte del curso tratará del análisis lingüístico y cultural de los datos recopilados.</p> <p>This is a face-to-face, hybrid and online course. Curso presencial, en línea e híbrido. En el semestre II del año académico 2022-2023, este curso se dará de manera presencial.</p>		
OBJETIVOS DE APRENDIZAJE:		

By the end of the course, the students will be able:

- 1) To convey the intellectual excitement of fieldwork.
- 2) To provide a realistic and relevant picture of the complexities of describing language as it is used by actual speakers in natural settings as well as in less natural ones (i.e., speech labs, sound-proof rooms, formal interviews).
- 3) To understand the importance not merely of the collection of data, in this case data from an English-speaking area of the Afro-Caribbean, as an end in itself but also for: (a) its contribution to the advancement of theory, (b) the understanding of variation across languages and cultures, and (c) its unmasking of the effects of global forces on language and culture.
- 4) To critically analyze the role of the researcher in collecting, interpreting and otherwise using data, especially in a globalized context.
- 5) To develop a research methodology which approaches native speakers as collaborators-‘partners’ and somehow positively contributes to the community being studied in their attempts to come to terms with the current wave of globalization.
- 6) To properly operate equipment used in the recording of oral culture and the collection of speech samples for linguistic analysis.
- 7) To design and administer relevant questionnaires.
- 8) To use the original data or information collected during field-based research in subsequent work.
- 9) To put research into action/practice through community service.
- 10) To contribute in an effective way to the integration of fellow students with special challenges and needs into the learning environment.
- 11) To participate in teamwork designed to make necessary adjustments for the inclusion of students with special challenges and needs.
